

Android Project

Chart Creation Application

Objective: -

- To create an android application that can generate different types of charts by accepting input from the user, as per his/her requirements.
- Inputs may be accepted from the users in the below forms:
 - Single tap input: User can tap(click) and select the type of chart(Column, Bar, Pie, etc..) that they require.
 - The data range necessary for the chart can be inserted using their device's keypad.
 - User might also have an option of dragging and dropping data items of one chart into another to generate a new chart for that data element.

Schedule:

Sr No	Task Name	Start Date	Finisl
1	Learn Android	28-1-2015	7-2-
2	Module Design and Testing	8-2-2015	14-2-
3	Implementation	15-2-2015	28-2-
4	App Testing & Improvement	1-3-2015	31-3-

Sr No	Task Name	Respo
1	Concept	Sandip & D
2	Module Design	Sandip & D

3	Module Testing	Sandip & D
4	Module Coding	Sandip & D
5	Module Code Testing	Dnyan
6	Module Integration	Sa
7	System Testing	Sandip & D
8	Interface Improvement	Sandip & D
9	Finalizing	Sandip & D
